

NovaJet® Inkjet Backlit Frontprint PET 125

For aqueous (dye & pigment), UV & latex inkjet printing of backlit displays

Description & Application

NovaJet Inkjet Backlit Frontprint PET 125 (IJB 5305) is a polyester film, top coated with a translucent white matte ink-receptive layer for front printing of indoor and semi-outdoor backlit displays. It is suitable for applications in backlit boxes, scrollers (motion displays), LED frames, POP & POS displays

Features & Benefits

- Superior white base for wide colour gamut and deep rich colours
- PET film base provides tear resistance & thermal stability for long term durability
- Special coating for uniform light diffusion and excellent backlit effect
- Scratch-free, tear resistance surface for use in motion displays
- Non -Tear and lay flat properties for hassle free mounting and framing
- High strength film suitable for use in motion displays
- PVC-free media for eco-friendly printing

Specifications

- Base : Polyester Film (PET)
- Total Thickness : 125 ± 6 Micron
- Total Weight : 160 ± 7 GSM
- Surface Finish : White Matte
- Coated Side : Single Side. Front Printing
- Ink Compatibility : Aqueous (Dye & Pigment) & UV
- Shelf-Life : One year from the date of manufacturing when stored in original packing at 20-25°C and 50-65% RH
- Availability : 305mm x 30m, 508mm x 30m, 610mm x 30m;
914mm x 30m; 1270 mm x 30 m;
Also available in custom size on request

Ink Compatibility

- This media is compatible with original inks of the most aqueous (dye & pigment) & UV printers. Please consult the ink/printer manufacturer for technical advice if required.
- Check the compatibility of the inks with the media before commencing actual production.
- The performance of the media will be hampered on old/obsolete/discontinued printing devices due to wear & tear, lack of support from hardware vendors. Our current products are suited to work on the latest models keeping in line with recent advances in printing technologies
- To achieve best possible print quality, please make sure that correct ICC profiles and heater settings are used. For further assistance, please contact our HelpDesk.

Durability of Media

- The durability of the printed image is dependent on the fading characteristics of the inks used.
- To protect the printed graphics from harsh atmosphere, scratching or friction we recommend using a UV stabilized, cold, pressure sensitive lamination film.
- Pre-test the compatibility of the lamination film with the printed media.
- Allow 8 hours of drying time of the print before lamination.

Usage Instructions

- Condition the media in the normal printing environment for 24 hours before printing.
- Print the media within the specified ink limit. Exceeding the ink limit can lead to longer drying time, bleeding and lower resolution. For best results, use colour calibration.
- Printed media should be thoroughly dried before rolling-up for transport to avoid ink smearing.
- Post-processing for hem is not required. If necessary, banner tape is preferred to sewing. Grommets should be placed through 2 layers in the hemline.
- Corner grommets should be placed where the vertical and horizontal hemlines meet, so that they pass through 4 layers of the media.
- Use a pair of cotton gloves to handle the media and protect it from sweat, grease & oil. When not in use, store the media in original packing in a vertical position.

About Us

TechNova is one of the world's largest suppliers of print solutions. TechNova's innovative and world-class products cater to a wide range of industries, such as Commercial & Newspaper Printing, Publishing, Packaging, Signage, Photo, Textile, & Engineering.

TechNova's name is derived from the words “technology” and “innovation”, and it is these two tenets that form TechNova's core mission. Globally recognised as a pioneer, TechNova has introduced several breakthrough technologies and innovative products that have transformed various print processes and created new markets.

With its wide distribution and logistics network in India, TechNova's products & services are used by every printer in the country. In addition to its leadership position in India, TechNova markets its products to over 60 countries through its international offices and distribution network.

Uniting all TechNova's businesses is its value system - a strict code of ethics, commitment to excellence, business conduct based on honesty, fairness & mutual trust, and a “Customer First” philosophy.

Highlights

- World's only manufacturer of full range of Digital Offset Plates : Violet, Thermal, UV, Inkjet & Laser
- India's largest manufacturer of Offset Plates & Printing Chemicals
- Products distributed to over 60 countries worldwide
- Widest portfolio of Digital Print Media for Inkjet & Laser printing
- 70% market share in India for each of its product groups
- IMS Certifications : ISO 9001:2015 for QMS; ISO 14001:2015 EMS and ISO 45001:2018 for OHS
- Winner of the prestigious GATF InterTech Technology Award
- Pioneer of the “Go Green” revolution in the Indian print industry

Digital Print Media Portfolio

TechNova's expertise lies in coating a variety of substrates to produce a range of Digital Print Media that helps effortless transformation of images into works of art.

TechNova's Digital Print Media range is manufactured in one of the world's most sophisticated coating and converting plants. It is optimised for best results for diversified industry segments like Photo, Signage, Engineering, Architecture, Education and Hospitality.

- **Premium Non-Tear Media** : Non-tear films & papers for photo and general commercial printing using digital production presses
- **Inkjet Photo Media** : Films & papers for photo and proofing applications using dry labs, desktop and large-format inkjet printers
- **Industrial Labels** : Self-Adhesive films & papers for digital production presses
- **Specialty Labels** : Pre-cut A4 size self-adhesive synthetic labels
- **Multipurpose Labels** : Pre-cut A4 size self-adhesive labels for desktop inkjet & laser printers and copiers
- **Wide-format Print Media** : Non-tear films & papers for signage and display applications using wide-format printer
- **Polyester Offset Plates** : Inkjet & Laser imaged polyester offset plates for sheet-fed, small & wide-format printers
- **Positive Films** : Inkjet & Laser imaged polyester films for exposing offset & flexo plates & screens
