

NovaJet® Photo Matte Premium Paper 160

For inkjet printing of colour graphics, CAD drawings & GIS imaging

Description & Application

NovaJet Coated Matte Paper Premium 160 (CMP 6207)) is matte finish paper, top-coated with an ink- receptive layer for printing of colour graphics, CAD drawings, GIS imaging, proofing and many other applications.

Features & Benefits

- Special coating for sharp & high-resolution images
- Superior whiteness for wide colour gamut & deep rich colours
- High opacity for limited show-through
- Quick drying for high productivity

Specifications

- Base : Paper
- Total Weight : 160 ± 7 gsm
- Surface Finish : White Matte
- Coated Side : Single Side
- Ink Compatibility : Aqueous Dye & Pigment inks
- Available Size : 610 mm x 30 m; 914 mm x 30 m; 1067 mm x 30 m; 1118 mm x 30 m. Also available in custom size on request
- Shelf-life : One year from date of manufacture when stored in original packing at 20-25°C and 50% RH.

Usage Instructions

- Condition the media in the normal printing environment for 24 hours before printing
- Pre-test ink compatibility with the media before printing the final design. Use original inks for printing. Compatibility of media with refilled inks (3rd party inks) must be checked before use.
- The media should be printed within the specified ink limit. Exceeding the ink limit can lead to longer drying time, bleeding, lower resolution and poor adhesion of the lamination film.
- Printed media should be thoroughly dried for at least 30 minutes before rolling-up for transport or before lamination.
- The absorbent nature of the paper may result in the warping of the media when printed with a heavy, graphic intensive file leading to difficulties in printing. Special care should be taken while printing such files to avoid damage to the printer head. Please contact our Application Expert for further assistance.
- If the printed graphics are likely to be exposed to corrosive liquids, smoke, fumes, pollution or likelihood of scratching or friction, it is strongly recommended that the prints are laminated with a cold lamination film.
- The lamination film must be checked for compatibility with the media. Exposure to more than 40°C through a heat lamination process is not at all recommended.
- A fresh pair of cotton gloves should be used while handling the bare media to avoid sweat, grease and oil transfer on to the media that could adversely affect the print quality.
- When not in use, the media should be stored in its original packing in a vertical position.

About Us

TechNova is one of the world's largest suppliers of print solutions. TechNova's innovative and world-class products cater to a wide range of industries, such as Commercial & Newspaper Printing, Publishing, Packaging, Signage, Photo, Textile, Engineering & Medical Imaging.

TechNova's name is derived from the words “technology” and “innovation”, and it is these two tenets that form TechNova's core mission. Globally recognised as a pioneer, TechNova has introduced several breakthrough technologies and innovative products that have transformed various print processes and created new markets.

With its wide distribution and logistics network in India, TechNova's products & services are used by every printer in the country. In addition to its leadership position in India, TechNova markets its products to over 60 countries through its international offices and distribution network.

Uniting all of TechNova's businesses is its value system - a strict code of ethics, commitment to excellence, business conduct based on honesty, fairness & mutual trust, and a “Customer First” philosophy.

Highlights

- World's only manufacturer of full range of Digital Offset Plates : Violet, Thermal, UV, Inkjet & Laser
- India's largest manufacturer of Offset Plates & Printing Chemicals
- Widest portfolio of Digital Print Media for Inkjet & Laser
- 70% market share in India for each of its product groups
- ISO 9001:2015 Certification
- ISO 14001 & ISO 18001 Certification
- Winner of the prestigious GATF InterTech Technology Award
- Pioneer of the “Go Green” revolution in the Indian print industry

TechNova's Go Green Mission

Our Planet is our most vital resource. We must do all we can to preserve it. TechNova is committed to helping the printing industry adopt eco-friendly solutions, reduce carbon footprint, eliminate waste and facilitate sustainable growth.

To help achieve this, we at TechNova have embarked on a “Go Green” mission :

- To promote Green awareness within TechNova, with our stakeholders and within the printing industry
- To develop, manufacture and supply eco-friendly Green products and services that have the least impact on the environment
- To comply with, and go beyond, all applicable legal requirements with regards to the environment and help our customers achieve the same.
