

NovaLife[®] Falcon 230 DS (Falcon 230)

Composite Synthetic Paper for general commercial applications

Description & Application

NovaLife Falcon 230 DS (Falcon 230) is a composite synthetic paper, both-side coated, white matte opaque film for Dry Toner, Offset, Flexo and Screen Printing. Ideally suited for brochures, calendars, plant tags, cattle identification tags, menu cards, shop-floor manual books, maps, garment tags, certificate, banner and many more

Features & Benefits

- Composite Film base provides superior tensile and tear strength
- Soft silk finish gives a premium paper feel
- Writable surface for adding comments & signatures

Specifications

- Base : Composite PP
- Total Thickness : 230 ± 10 microns (275 ± 5 gsm)
- Surface Finish : White Matte
- Opacity : > 97%
- Printability : Both side printable
- Available Sizes : 330 x 482, 305 x 457, 530 x 750

Printer Compatibility

A Dry toner

Brand	Model
Konica Minolta	C73hc, C83hc, C74hc, C84hc, C3070, C3080, C4085, C4065, C4070, C4080, C6085, C6100, C7100, C12000, C14000
Xerox	Versant: 180, 280, 2100, 3100, 4100 Gen: 3, 4, 5, 150 Xerox Iridesse Production press
Canon (ImagePress)	C265, C650, C810, C850, C910, V9000, V1000, V1350, C7011VP, C8000VP, C9010VP, C7000VP, C10000VP
Ricoh	Pro: 5300S, C5310S, C7100, C7200, C7210, C7500, C9200, C9210, C9500
FujiFilm	Revoria Press: PC1120, Ec1100 Apeos: C650, C750, C810

B Other Printing Technologies

Offset Printing	Standard offset ink can be used. For best results, use oxidative inks with alcohol dampening system. For incorporation of security features, invisible & florescent inks can also be used
Inkjet Printing	UV inks (such as Km1) & Latex inks
Laser Printing	Compatible with most of desktop laser printers (A4, A3)

Usage Instructions

- We recommend, thorough testing of the substrate for intended application prior to use
- Please refer the user guide of the printing machine for correct printer settings
- For best output & media settings, please consult the service engineer of the press
- Please ensure the sheets are acclimatized to the printing environment for 24 hours before use
- Best print results can be obtained at 20-25°C, 55% ± 10% relative humidity (RH)
- To facilitate jam-free feeding, please fan or jog the sheets before printing. It is recommended to use suction feeding systems.
- In addition to extend print life, lamination or varnishing after printing is advisable. The lamination film or varnish must be checked for compatibility with the media
- The durability of the printed images will depend on the fading characteristics of the ink or toner used. Please consult with press manufacturer for technical advice
- The performance of the media will be compromised on old/discontinued/un-serviced printing devices. Our current products are designed to work on the latest models.

Storage, Handling & Packaging

- **Storage & Handling** : Hold media by the edges to avoid kink marks. Fingerprints will affect the quality of the image. A fresh pair of cotton gloves should be used while handling unprinted media to avoid sweat, grease and oil transfer on to the media that could affect the print quality. When not in use, store the media in cool, dry place [20-25°C, 55% ±10% RH] away from direct sunlight in its original packing. Keep media in flat position to avoid curling
- **Ageing** : Almost no deterioration or discoloration under normal environmental conditions when kept away from strong UV light and protected against extreme conditions
- **Ecology** : This media can be recycled through appropriate polyester (PET) recycling channels
- **Shelf-life** : For optimum results, use the media within one year from the date of manufacture
- **Pack Size** : Available in 500 sheets (100 sheets x 5 packs) pack

About Us

TechNova is one of the world's largest suppliers of print solutions. TechNova's innovative and world-class products cater to a wide range of industries, such as Commercial & Newspaper Printing, Publishing, Packaging, Signage, Photo, Textile, Engineering & Medical Imaging.

TechNova's name is derived from the words "technology" and "innovation", and it is these two tenets that form TechNova's core mission. Globally recognised as a pioneer, TechNova has introduced several breakthrough technologies and innovative products that have transformed various print processes and created new markets.

With its wide distribution and logistics network in India, TechNova's products & services are used by every printer in the country. In addition to its leadership position in India, TechNova markets its products to over 60 countries through its international offices and distribution network.

Uniting all TechNova's businesses is its value system - a strict code of ethics, commitment to excellence, business conduct based on honesty, fairness & mutual trust, and a "Customer First" philosophy.

TechNova Printrite Product Portfolio

TechNova's expertise lies in coating a variety of substrates to produce a range of Digital Print Media that helps effortless transformation of images into works of art.

TechNova's Digital Print Media range is manufactured in one of the world's most sophisticated coating and converting plants. It is optimised for best results for diversified industry segments like Photo, Signage, Engineering, Architecture, Education and Hospitality.

- **Premium Non-Tear Media** : Non-tear films & papers for photo and general commercial printing using digital production presses
- **Inkjet Photo Media** : Films & papers for photo and proofing applications using dry labs, desktop and large-format inkjet printers
- **Industrial Labels** : Self-Adhesive films & papers for digital production presses
- **Specialty Labels** : Pre-cut A4 size self-adhesive synthetic labels
- **Multipurpose Labels** : Pre-cut A4 size self-adhesive labels for desktop inkjet & laser printers and copiers
- **Wide-format Print Media** : Non-tear films & papers for signage and display applications using wide-format printer
- **Polyester Offset Plates** : Inkjet & Laser imaged polyester offset plates for sheet-fed, small & wide-format printers
- **Positive Films** : Inkjet & Laser imaged polyester films for exposing offset & flexo plates & screens
