

NovaSign® Eco-solvent Backlit PET 175 BW

Premium Non-tear PET Film for Eco Solvent, Solvent, UV & Latex Inkjet Printers

Description & Application

NovaSign Eco-sol Backlit PET 175 BW (ESB 7037 BW) is a top-coated PET (PolyEthylene-Terephthalate) film with a bright white satin ink-receptive layer for front printing of indoor and semi-outdoor backlit displays. It is suitable for applications in backlit boxes, scrollers (motion displays), LED frames, POP & POS displays

Features & Benefits

- Superior white base for a wide colour gamut and deep rich colours
- PET film provides a sturdy construction, tear resistance & stiffness while handling & Installation.
- Thermal stability for long-term Scroller Displays
- Specially designed light diffusion coating offers uniform backlit properties
- Anti-skid & anti-static back coating provides superior grip while printing.

Specifications

- | | |
|---------------------|---|
| • Base | : Polyester Film (PET) |
| • Total Thickness | : 175 ± 6 micron |
| • Total Weight | : 227 ± 7 gsm |
| • Surface Finish | : Bright White Satin |
| • Opacity | : 67.5% ± 2% |
| • Printability | : Single Side (Front Printing) |
| • Ink Compatibility | : Eco Solvent, Solvent, UV & Latex Inkjet Printers |
| • Availability | : 940mm x 50m; 1270mm x 50m
Also available in custom size on request |

Ink Compatibility

- This media is compatible with original inks of the most Eco-Solvent, Solvent, UV & latex inkjet printers. Please consult the ink/printer manufacturer for technical advice if required.
- We recommend thorough testing of the substrate for the intended application before use.
- The performance of the media will be compromised on old/discontinued/un-serviced printing devices. Our current products are designed to work on the latest models.

Durability of Media

- The durability of the printed image is dependent on the fading characteristics of the inks used.
- To protect the printer media from harsh atmosphere, scratching or friction, we recommend using a UV stabilized, cold, pressure sensitive lamination film.
- Check the compatibility of the lamination film with the printed media.
- Allow 8 hours of drying time of the prints before lamination.

Usage Instructions

- Condition the media in the normal printing environment for 24 hours before printing.
- A fresh pair of cotton gloves could be used while handling unprinted media to avoid sweat, grease & oil transfer on to the media that could affect the print quality.
- Print the media within the specified ink limit. Exceeding the ink limit can lead to longer drying time, bleeding and lower resolution. For the best results, use colour calibration.
- To achieve the best possible print quality, please ensure correct ICC profiles & heater settings are followed. For further assistance, please contact: help@technovaindia.com
- Printed media should be thoroughly dried before rolling-up for transport to avoid ink smearing.
- Post-processing for hem is not required. If necessary, banner tape is preferred to sewing. Grommets could be placed through 2 layers in the hemline.
- Corner grommets could be placed where the vertical and horizontal hemlines meet, so that they pass through 4 layers of the media.

About Us

TechNova is one of the world's largest suppliers of print solutions. TechNova's innovative and world-class products cater to a wide range of industries, such as Commercial & Newspaper Printing, Publishing, Packaging, Signage, Photo, Textile, & Engineering.

TechNova's name is derived from the words "technology" and "innovation", and it is these two tenets that form TechNova's core mission. Globally recognised as a pioneer, TechNova has introduced several breakthrough technologies and innovative products that have transformed various print processes and created new markets.

With its wide distribution and logistics network in India, TechNova's products & services are used by every printer in the country. In addition to its leadership position in India, TechNova markets its products to over 60 countries through its international offices and distribution network.

Uniting all TechNova's businesses is its value system - a strict code of ethics, commitment to excellence, business conduct based on honesty, fairness & mutual trust, and a "Customer First" philosophy.

Highlights

- World's only manufacturer of full range of Digital Offset Plates : Violet, Thermal, UV, Inkjet & Laser
- India's largest manufacturer of Offset Plates & Printing Chemicals
- Products distributed to over 60 countries worldwide
- Widest portfolio of Digital Print Media for Inkjet & Laser printing
- 70% market share in India for each of its product groups
- IMS Certifications : ISO 9001:2015 for QMS; ISO 14001:2015 EMS and ISO 45001:2018 for OHS
- Winner of the prestigious GATF InterTech Technology Award
- Pioneer of the "Go Green" revolution in the Indian print industry

Product Portfolio

TechNova Printrite Product Portfolio

TechNova's expertise lies in coating a variety of substrates to produce a range of Digital Print Media that helps effortless transformation of images into works of art.

TechNova's Digital Print Media range is manufactured in one of the world's most sophisticated coating and converting plants. It is optimised for best results for diversified industry segments like Photo, Signage, Engineering, Architecture, Education and Hospitality.

- **Premium Non-Tear Media** : Non-tear films & papers for photo and general commercial printing using digital production presses
- **Inkjet Photo Media** : Films & papers for photo and proofing applications using dry labs, desktop and large-format inkjet printers
- **Industrial Labels** : Self-Adhesive films & papers for digital production presses
- **Specialty Labels** : Pre-cut A4 size self-adhesive synthetic labels
- **Multipurpose Labels** : Pre-cut A4 size self-adhesive labels for desktop inkjet & laser printers and copiers
- **Wide-format Print Media** : Non-tear films & papers for signage and display applications using wide-format printer
- **Polyester Offset Plates** : Inkjet & Laser imaged polyester offset plates for sheet-fed, small & wide-format printers
- **Positive Films** : Inkjet & Laser imaged polyester films for exposing offset & flexo plates & screens
