

NovaSign® UV Latex BannerMatte PET 175

For UV & latex inkjet printing of front-lit banners

Description & Application

NovaSign UV Latex BannerMatte PET 175 (UMO 175) is a non-tear, polyester film, top-coated with an ink-receptive layer for indoor and outdoor front-lit signages. It is suitable for roll-up banners, hanging banners, backdrops & other signage applications.

Features & Benefits

- Special coating for sharp and vibrant prints
- Bright white finish offers superior contrast & wide colour gamut
- High opacity for limited show through
- Stiffer non-curling base makes it ideal for most banner applications

Specifications

- Base : Polyester film
- Total Thickness : 175 ± 7 Micro
- Total Weight : 246 ± 10 gsm
- Surface Finish : White Matte
- Back Finish : White Opaque
- Gloss Value (@60°) Picometer : 7 ± 2
- Ink Compatibility : UV & Latex Inks
- Shelf-life : One year from the date of manufacturing when stored in Original packing at 20-25°C and 50% RH.
- Available Sizes : 914 mm x 50 m; 1067 mm x 50 m; 1118 mm x 50m; 1270 mm x 50 m; 1370 mm x 50 m & 1524 mm x 50 m
Also available in custom size rolls on request

Ink Compatibility

- This media is compatible with original inks of most UV & latex printers. Please consult the ink/printer manufacturer for technical advice if required.
- Pre-test the compatibility of the inks with the media before commencing actual production.
- To achieve best possible print quality, please make sure that correct ICC profiles and heater settings are used. For further assistance, please contact our HelpDesk.

Durability of Media

- The durability of the printed image is dependent on the fading characteristics of the inks used.
- To protect the printed graphics from harsh atmosphere, scratching or friction we recommend using a UV stabilized, cold, pressure sensitive lamination film.
- Pre-test the compatibility of the lamination film with the printed media. Allow 8 hours of drying time of the print before lamination.

Usage Instructions

- Condition the media in the normal printing environment for 24 hours before printing.
- Print the media within the specified ink limit. Exceeding the ink limit can lead to longer drying time, bleeding and lower resolution. For best results, use colour calibration.
- Printed media should be thoroughly dried before rolling-up for transport to avoid ink smearing.
- Post-processing for hem is not required. If necessary, banner tape is preferred to sewing. Grommets should be placed through 2 layers in the hemline.
- Corner grommets should be placed where the vertical and horizontal hemlines meet, so that they pass through the 4 layers of the media.
- Use a pair of cotton gloves to handle the media and protect it from sweat, grease & oil.
- When not in use, store the media in original packing in a vertical position.

About Us

TechNova is one of the world's largest suppliers of print solutions. TechNova's innovative and world-class products cater to a wide range of industries, such as Commercial & Newspaper Printing, Publishing, Packaging, Signage, Photo, Textile, Engineering & Medical Imaging.

TechNova's name is derived from the words “technology” and “innovation”, and it is these two tenets that form TechNova's core mission. Globally recognised as a pioneer, TechNova has introduced several breakthrough technologies and innovative products that have transformed various print processes and created new markets.

With its wide distribution and logistics network in India, TechNova's products & services are used by every printer in the country. In addition to its leadership position in India, TechNova markets its products to over 60 countries through its international offices and distribution network.

Uniting all of TechNova's businesses is its value system - a strict code of ethics, commitment to excellence, business conduct based on honesty, fairness & mutual trust, and a “Customer First” philosophy.

Highlights

- World's only manufacturer of full range of Digital Offset Plates : Violet, Thermal, UV, Inkjet & Laser
- India's largest manufacturer of Offset Plates & Printing Chemicals
- Widest portfolio of Digital Print Media for Inkjet & Laser
- 70% market share in India for each of its product groups
- ISO 9001:2015 Certification
- ISO 14001 & ISO 18001 Certification
- Winner of the prestigious GATF InterTech Technology Award
- Pioneer of the “Go Green” revolution in the Indian print industry
